## Usability

### Your usability needs improvement

Your page has usability issues across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

##### Use of Mobile Viewports

Your page either does not have a meta viewport specified, or it is configured incorrectly. Viewports are important to ensure that your page content sizes appropriately for different devices, in particular mobile and tablet.

##### Legible Font Sizes

There is some text on your page that is small and may not be legible enough for particular users. We recommend reviewing all text on your page in different devices to ensure that it is of appropriate size.

##### Tap Target Sizing

Some of the links or buttons on your page may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

## Your performance needs improvement

Your page's performance has various issues that may be adversely affecting users. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

### Number of Resources

This check displays the total number of files that need to be retrieved from web servers to load your page. As a general rule, having more files to retrieve increases the number of server requests and can subsequently increase page load time. It is a good idea to removing unnecessary files or consolidate files like styles and scripts where possible.

### JavaScript Errors

Your page is not reporting any JavaScript errors.

### GZIP Compression

We could not identify GZIP compression being used on your website.

We recommend enabling this feature as it can reduce page size by 70% and significantly speed up page load for users.

### Optimize Images

Your page appears to include images which are poorly optimized. Properly formatting and compressing images can have a significant impact on page load performance.

## Security Results

### Your security looks very good!

We haven't identified obvious security problems on your website. Security is important to ensure your website protects user data, doesn't become compromised or experience downtime or data loss. We recommend ongoing patching and the continuous use of protective monitoring tools.

#### SSL Enabled

Your website has SSL enabled.

#### HTTPS Redirect

Your page successfully redirects to a HTTPS (SSL secure) version.

#### Malware Check

Your website has been flagged as safe by popular malware scanners

#### Critical Software Up To Date

No outdated software versions were identified on your server.

## Technology Results

#### Technology List

No software or coding libraries could be identified on your page.

#### Server IP Address

201.131.123.25

#### DNS Servers

#### Web Server

#### Charset

text/html; charset=UTF-8

# Recommendations

Mobile & UI	Set a mobile viewport	Medium Priority
Performance	Make use of GZIP compression	Low Priority
Performance	Optimize your images to reduce their file size	Low Priority
Mobile & UI	Review and Increase Font Sizes across devices	Low Priority
Mobile & UI	Improve the size of tap targets	Low Priority
