## Your usability is very good!

Your page is highly usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

### Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

### Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

### Flash Used?

No Flash content has been identified on your page.

### iFrames Used?

There are no iFrames detected on your page.

### Favicon

Your page has specified a favicon.

### Legible Font Sizes

The text on your page appears to be legible across devices.

### Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

## Performance Results

### Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

#### Page Speed Info

Your page's server response time is OK but, we would recommend optimizations to improve user experience. There are a variety of technical factors such as the web server engine and routing rules that can impact server responsiveness.

## JavaScript Errors

Your page is not reporting any JavaScript errors.

## GZIP Compression

We could not identify GZIP compression being used on your website.

We recommend enabling this feature as it can reduce page size by 70% and significantly speed up page load for users.

## Optimize Images

Your page appears to include images which are poorly optimized. Properly formatting and compressing images can have a significant impact on page load performance.

## Minification

All your JavaScript and CSS files appear to be minified.

## Deprecated HTML

No deprecated HTML tags have been found within your page.

## Inline Styles

Your page appears to be using inline styles. Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

## Your social could be better

You do not appear to have a strong social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page for visibility, and work to build a following on those networks.

### Facebook Connected

Your page has a link to a Facebook Page.

### Twitter Connected

No associated Twitter profile found as a link on your page.

### Google+ Connected
