Your SEO needs improvement

Your page is not well optimized from an SEO perspective. SEO optimization is important to ensure you can maximize ranking potential and drive traffic to your website from search engines. You should ensure your page fulfils basic recommended improvements outlined here.

HTML HEADER

Title Tag

You have a title tag of optimal length (between 10 and 70 characters).

Banco Nacional de Costa Rica

Length : 28

Meta Description Tag

Your page appears to be missing a meta description tag. A meta description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

BODY CONTENT

Header Tags

Your page is not making effective use of header tags.

HTML header tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Header Tag	Frequency
H1	0
H2	0
H3	0
H4	0
H5	0
H6	0

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

Individual Keywords

Keyword	Title	Meta Description Tag	Headings Tags	Page Frequency	
servicios	×	×	×	2	<div></div>
lunes	×	×	×	1	<div></div>

On-Page Link Structure

We found 32 total links. 19% of your links are external links and are sending authority to other sites. 0% of your links are nofollow links, meaning authority is not being passed to those destination pages.

Broken Links

We have found 3 broken link(s) on your page. Broken links are confusing to users and can reduce traffic and ranking ability of pages.

Friendly URLs

Some of your link URLs do not appear friendly to humans or search engines. We would recommend making links as readable as possible by reducing length, file names, code strings and special characters.

OTHER

Robots.txt

We have not detected or been able to retrieve a robots.txt file successfully.

A robots.txt file is recommended as it can provide important instructions to a search engine for how to most appropriately crawl your website as well as site areas that should be ignored.

XML Sitemaps

We have not detected or been able to retrieve a XML sitemaps file successfully.

A sitemap includes a list of your pages that are available for crawling, as well as other useful information for search engines such as last update times and priority of pages. Sitemaps are recommended to ensure that search engines can intelligently crawl all of your pages.

Analytics

We could not detect an analytics tool installed on your page.

Website analytics tools like Google Analytics assist you in measuring, analyzing and ultimately improving traffic to your page.

Usability

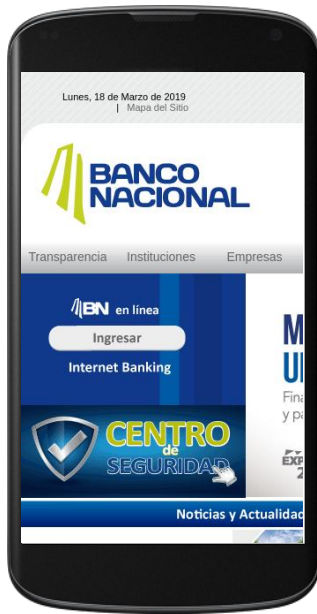

Your usability needs improvement

Your page has usability issues across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Use of Mobile Viewports

Your page either does not have a meta viewport specified, or it is configured incorrectly. Viewports are important to ensure that your page content sizes appropriately for different devices, in particular mobile and tablet.

Flash Used?

Flash content has been identified on your site. Flash is a deprecated technology which renders poorly on mobile devices and cannot be indexed by search engines.

iFrames Used?

There are no iFrames detected on your page.

Favicon

Your page has specified a favicon.

Legible Font Sizes

There is some text on your page that is small and may not be legible enough for particular users. We recommend reviewing all text on your page in different devices to ensure that it is of appropriate size.

Tap Target Sizing

Some of the links or buttons on your page may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

Performance Results

Your performance is good

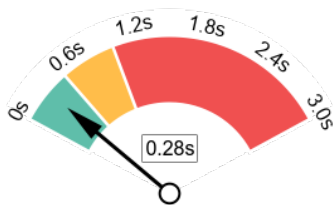

Your page has performed well in our testing meaning it should be reasonably responsive for your users, but there is still room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings).

Page Speed Info

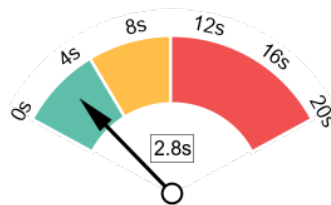

Your page's server response time is reasonably low which is good for load speed and user experience.
