## SEO Results

**Your SEO could be better**

Your page has some level of optimization but could be improved further. SEO optimization is important to ensure you can maximize ranking potential and drive traffic to your website from search engines. You should ensure your page fulfils common recommended improvements outlined here before moving onto more advanced SEO strategies.

### HTML HEADER

#### Title Tag

You have a title tag of optimal length (between 10 and 70 characters).

Capital Bank

Length : 12

Meta Description Tag

Your page appears to be missing a meta description tag. A meta description is important for search engines to understand the content of your page, and is often shown as the description text blurb in search results.

BODY CONTENT

Header Tags

Your page is making good use of header tags.

HTML header tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Header Tag	Frequency	
H1	16	<div></div>
H2	8	<div></div>
H3	1	<div></div>
H4	1	<div></div>
H5	0	
H6	12	<div></div>

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

Individual Keywords

### On-Page Link Structure

We found 195 total links. 6% of your links are external links and are sending authority to other sites. 0% of your links are nofollow links, meaning authority is not being passed to those destination pages.

### Broken Links

We have not detected any broken links on your page.

Please note, we were not able to crawl all links in the given time window. Only 10 of 43 total links found were able to be crawled.

### Friendly URLs

Some of your link URLs do not appear friendly to humans or search engines. We would recommend making links as readable as possible by reducing length, file names, code strings and special characters.

## OTHER

### Robots.txt

Your website appears to have a robots.txt file.

## Usability

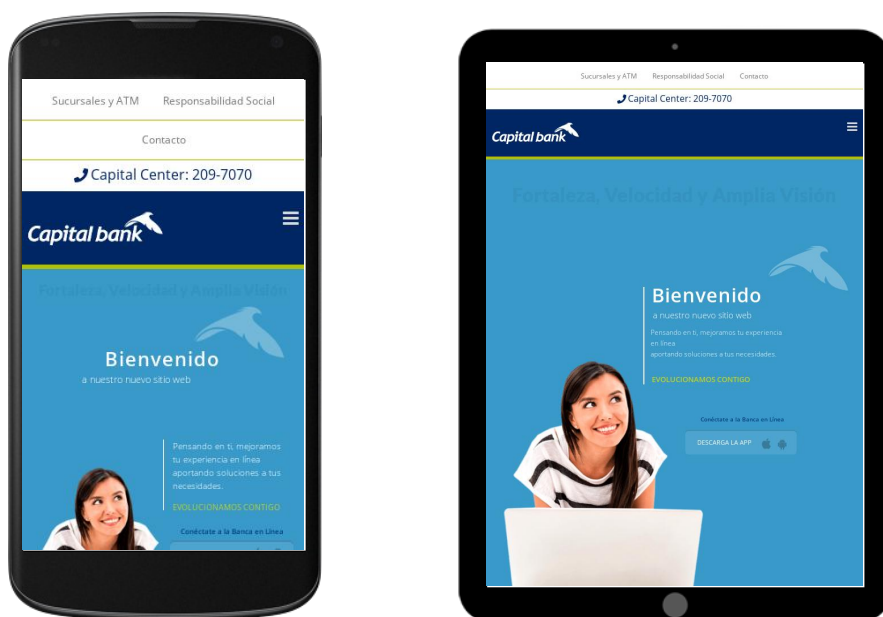

### Your usability is good

Your page is mostly usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

## Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

## Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

## Flash Used?

No Flash content has been identified on your page.

## iFrames Used?

There are no iFrames detected on your page.

## Favicon

Your page has specified a favicon.

## Legible Font Sizes

The text on your page appears to be legible across devices.

## Tap Target Sizing

Some of the links or buttons on your page may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

## Your performance needs improvement

Your page's performance has various issues that may be adversely affecting users. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

### Page Speed Info

Your page's server response time is OK but, we would recommend optimizations to improve user experience. There are a variety of technical factors such as the web server engine and routing rules that can impact server responsiveness.

Server Response

All Page Content Loaded

All Page Scripts Complete

### Page Size Info

Your page's file size is quite large which, regardless of other optimizations, can reduce load speed and impact user experience. A general rule is to keep your page under 5MB in total file size.

## JavaScript Errors

Your page is not reporting any JavaScript errors.

## GZIP Compression

Your website is using GZIP compression.

## Optimize Images

Your page appears to include images which are poorly optimized. Properly formatting and compressing images can have a significant impact on page load performance.

## Minification

All your JavaScript and CSS files appear to be minified.

## Deprecated HTML

No deprecated HTML tags have been found within your page.

## Inline Styles

Your page appears to be using inline styles. Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

### Your social could be better

You do not appear to have a strong social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page for visibility, and work to build a following on those networks.

#### Facebook Connected

Your page has a link to a Facebook Page.

#### Twitter Connected
