BODY CONTENT

Header Tags

Your page is making good use of header tags.

HTML header tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Header Tag	Frequency	
H1	3	<div></div>
H2	2	<div></div>
H3	2	<div></div>
H4	0	
H5	3	<div></div>
H6	0	

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

On-Page Link Structure

We found 128 total links. 30% of your links are external links and are sending authority to other sites. 0% of your links are nofollow links, meaning authority is not being passed to those destination pages.

Broken Links

We have found 4 broken link(s) on your page. Broken links are confusing to users and can reduce traffic and ranking ability of pages.

Please note, we were not able to crawl all links in the given time window. Only 58 of 80 total links found were able to be crawled.

Friendly URLs

Some of your link URLs do not appear friendly to humans or search engines. We would recommend making links as readable as possible by reducing length, file names, code strings and special characters.

OTHER

Robots.txt

Your website appears to have a robots.txt file.

XML Sitemaps

We have not detected or been able to retrieve a XML sitemaps file successfully.

A sitemap includes a list of your pages that are available for crawling, as well as other useful information for search engines such as last update times and priority of pages. Sitemaps are recommended to ensure that search engines can intelligently crawl all of your pages.

Analytics

Your page is using an analytics tool.

 Google Analytics

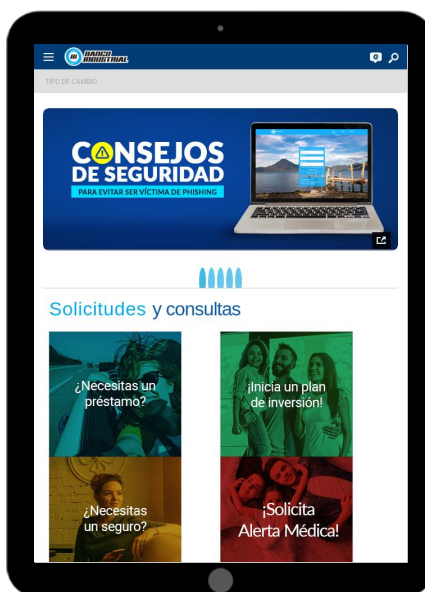

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

Your page appears to be using iFrames. iFrames are discouraged as they can complicate navigation of content in mobile and have historically been harder to index for search engines. There are particular coding libraries however such as Google Tag Manager that require iFrames as part of their functionality.

Favicon

Your page has specified a favicon.

Legible Font Sizes

The text on your page appears to be legible across devices.

Tap Target Sizing

Some of the links or buttons on your page may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

Performance Results

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

Page Speed Info

Your page's server response time is reasonably low which is good for load speed and user experience.

Page Size Info

Your page's file size is acceptable though could be improved. We recommend minimizing file size as much as possible to optimize load speed.

Number of Resources

This check displays the total number of files that need to be retrieved from web servers to load your page. As a general rule, having more files to retrieve increases the number of server requests and can subsequently increase page load time. It is a good idea to removing unnecessary files or consolidate files like styles and scripts where possible.

JavaScript Errors

Your page is not reporting any JavaScript errors.

GZIP Compression

Your website is using GZIP compression.

Optimize Images

Your page appears to include images which are poorly optimized. Properly formatting and compressing images can have a significant impact on page load performance.

Minification

All your JavaScript and CSS files appear to be minified.

Deprecated HTML

Deprecated HTML tags have been found within your page. These tags are no longer officially supported in modern web browsers, and hence are recommended to be removed as they could cause display issues.

Inline Styles

Your page appears to be using inline styles. Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

Social Results

Your social could be better

You do not appear to have a strong social presence or level of social activity (or we may just not be able to see your profiles!). Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page for visibility, and work to build a following on those networks.
