BODY CONTENT

Header Tags

Your page is making good use of header tags.

HTML header tags are an important way of signaling to search engines the important content topics of your page, and subsequently the keywords it should rank for.

Header Tag	Frequency
H1	0
H2	10
H3	0
H4	4
H5	0
H6	0

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

## On-Page Link Structure

We found 68 total links. 15% of your links are external links and are sending authority to other sites. 0% of your links are nofollow links, meaning authority is not being passed to those destination pages.

## Broken Links

We have not detected any broken links on your page.

Please note, we were not able to crawl all links in the given time window. Only 47 of 50 total links found were able to be crawled.

## Friendly URLs

Some of your link URLs do not appear friendly to humans or search engines. We would recommend making links as readable as possible by reducing length, file names, code strings and special characters.

## OTHER

### Robots.txt

Your website appears to have a robots.txt file.

<http://www.promerica.fi.cr/robots.txt>

### XML Sitemaps

We have not detected or been able to retrieve a XML sitemaps file successfully.

A sitemap includes a list of your pages that are available for crawling, as well as other useful information for search engines such as last update times and priority of pages. Sitemaps are recommended to ensure that search engines can intelligently crawl all of your pages.

### Analytics

Your page is using an analytics tool.

## Usability

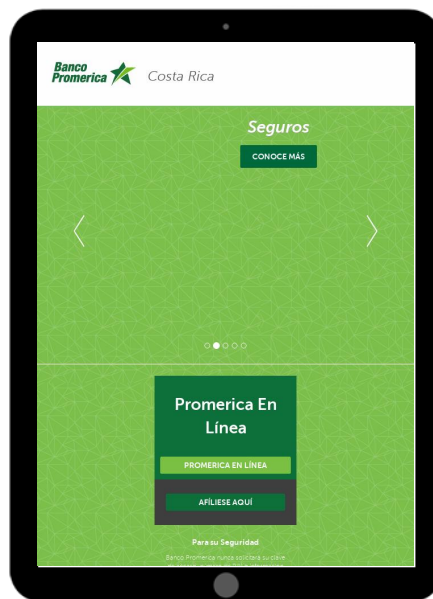

### Your usability is good

Your page is mostly usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

#### Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

#### Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

#### Flash Used?

No Flash content has been identified on your page.

#### iFrames Used?

Your page appears to be using iFrames. iFrames are discouraged as they can complicate navigation of content in mobile and have historically been harder to index for search engines. There are particular coding libraries however such as Google Tag Manager that require iFrames as part of their functionality.

#### Favicon

Your page has specified a favicon.

#### Legible Font Sizes

The text on your page appears to be legible across devices.

## Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

## Performance Results

### Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings). We recommend addressing the highlighted factors below.

### Page Speed Info

Your page's server response time is reasonably low which is good for load speed and user experience.

### Page Size Info

Your page's file size is acceptable though could be improved. We recommend minimizing file size as much as possible to optimize load speed.

### Number of Resources

This check displays the total number of files that need to be retrieved from web servers to load your page. As a general rule, having more files to retrieve increases the number of server requests and can subsequently increase page load time. It is a good idea to removing unnecessary files or consolidate files like styles and scripts where possible.

### JavaScript Errors

Your page is not reporting any JavaScript errors.

### GZIP Compression

We could not identify GZIP compression being used on your website.

We recommend enabling this feature as it can reduce page size by 70% and significantly speed up page load for users.

### Optimize Images

Your page appears to include images which are poorly optimized. Properly formatting and compressing images can have a significant impact on page load performance.

### Minification

All your JavaScript and CSS files appear to be minified.

### Deprecated HTML

No deprecated HTML tags have been found within your page.

### Inline Styles

Your page appears to be using inline styles. Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

## Your social is good

You have a reasonably good social presence. Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page, and work to build a larger following on those networks.

### Facebook Connected

Your page has a link to a Facebook Page.

### Twitter Connected

Your page has a link to a Twitter profile.

### Twitter Activity

You have a strong following on Twitter.

**374**

## Your security could be better

We recommend addressing the highlighted security items. Security is important to ensure your website protects user data, doesn't become compromised or experience downtime or data loss.

### SSL Enabled

We are unable to identify an SSL encrypted (HTTPS) version of your website.

SSL helps to secure the transfer of information on your page and is used as a ranking signal by search engines.

### HTTPS Redirect

Your page successfully redirects to a HTTPS (SSL secure) version.

### Malware Check

Your website has been flagged as safe by popular malware scanners

Google Safe Browsing

### Critical Software Up To Date

No outdated software versions were identified on your server.

### Email Privacy

Email addresses have been found in plain text. We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.
